We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audit included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. YEAR ENDED JUNE 30, 2019

NOTE 1 - DESCRIPTION OF BUSINESS

IQ Capital LLC (the "Company") is registered as a broker-dealer in securities transactions under the Securities Exchange Act of 1934. The Company is a member of the Financial Industry Regulatory Inc. (FINRA) and the Securities Investor Protection Corporation. The Company is a Delaware Limited Liability Corporation. The Company has adopted June 30 as its year end.

IQ Capital has been formed to provide private placement services and registered direct public offerings. The firm intends to raise capital for corporate clients ("Issuers") via private placements of Issuers' equity, equity linked, or debt securities to institutional investors. A typical private placement of securities would be closed or "settled and cleared" through the use of a qualified escrow agent. iQ Capital will not handle or take possession of client funds. Through Registered Direct Offerings, the firm intends to raise capital for corporate clients ("Registered Direct Offerings") by selling to institutional investors Reporting Issuers' equity, equity linked, or debt securities that are registered under shelf registration statements declared effective by the Securities and Exchange Commission. The firm intends to focus its efforts in the Life Science Industry, but will also do business with Reporting Issuers in various industry sectors.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Cash and Cash Equivalents

The Company considers all highly liquid debt instruments with original maturities of three months or less to be cash equivalents.

Property and Equipment

The main office is in New York City, New York. The accounting treatment for property and equipment is stated at cost less accumulated depreciation. Depreciation and amortization is provided using the straight-line method over the estimated economic lives of the assets, which are from five to seven years.

All fixed assets are fully depreciated and there was no depreciation expense in the audit period.

Revenue Recognition

In May 2014, the Financial Accounting Standards Board issued Accounting Standards Update (ASU) 2014-09, Revenue from Contracts with Customers, effective for annual reporting periods beginning after December 15, 2017. The core principle of this new standard states that an entity must recognize revenue in a manner that depicts the transfer of the promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Included among the requirements of ASU 2014-09 is that the entity must appropriately allocate revenues to the corresponding goods or services, and recognize such revenues at the time when the entity has performed under its respective obligations. The Company expects the adoption of this new standard will not have a material impact on the operating results of the Company.

NOTE 6 – FINANCIAL INSTRUMENTS

The Company measures the financial assets in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. These levels are:

Level 1 – Valuations for assets and liabilities traded in active exchange markets, or interest in open-end mutual funds that allow a company to sell its ownership interest back at net asset value (“NAV”) on a daily basis. Valuations are obtained from readily available pricing sources for market transactions involving identical assets, liabilities or funds.

Level 2 – Valuations for assets and liabilities traded in less active dealer, or broker markets, such as quoted prices for similar assets or liabilities or quoted prices in markets that are not active. Level 2 includes U.S. Treasury, U.S. government and agency debt securities, and mortgage-backed securities. Valuations are usually obtained from third party pricing services for identical or comparable assets or liabilities.

Level 3 – Valuations for assets and liabilities that are derived from other valuation methodologies, such as option pricing models, discounted cash flow models and similar techniques, and not based on market exchange, dealer, or broker traded transactions. Level 3 valuations incorporate certain assumptions and projections in determining the fair value assigned to such assets or liabilities.

The availability of observable inputs can vary from instrument to instrument and in certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement of an instrument requires judgment and consideration of factors specific to the instrument.

At June 30, 2019, the Company's cash equivalent include only “Cash In Bank” is valued utilizing quoted market prices for identical instruments and are thus categorized in Level 1 of the fair value hierarchy.
